I like to go for walks and I love animals, especially cows.

Studies

Academic program: Social Management and

Development

School name: Pontifical Catholic University of

Ecuador

Graduation: 2028

The Foundation

I learned about the foundation through my older sister (Lorena Chin), currently she has already graduated from the University. Our economic situation is not so good. But she met Mike and Margarita who were her mentors at the Center.

I met Mike and Margarita at the Working Boy Center, I remember that Mike helped us with our tasks. After many years, I met Mike, Margarita and Rubén, they explained to me what the foundation is like and I realized that it is not like many foundations. DEOF is like a family where camaraderie and humility go hand in hand. It is incredible to belong to this foundation.

2024 Update:

I am part of DEOF for short time, but the foundation means a lot for me now. The foundation has not only supported me in my studies, but has also made me grow professionally and personally. Thanks to their values, philosophy and their advice, they have made me a better person. I am very grateful to them.
