We have 5 kittens and 5 puppies; all of them were rescued and sterilized.

What are your favorite pastimes or hobbies?

Reading, walking, trekking.

Studies

Academic program: Health

School name: The University of the Americas (UDLA)

Graduation: 2028

The Foundation

I met Maggie and Mike through my time at the Working Boys Center. The image I have of them is two compassionate and good people who were always willing to help my family. Thanks to DEOF my sister Juanita has already advanced in her studies in Law at the Indo-American University. His proposal to be part of the foundation was one of the happiest moments of my life for me. I am preparing for my time at university to be successful. The foundation's support has made a very significant difference in my family's life.

2024 Update:

I am about to start the first semester of nursing at the University of the Americas. That is why I have received career-based tutoring with Margarita. At the same time, I have carried out volunteer activities at the Working Families Foundation, providing homework help to different students. Among the activities proposed by DEOF, the ones I have enjoyed the most are the self-defense classes and the visit to the Guayllabamba zoo.
